

SAFETY DATA SHEET

Wire Rope Lube

Infosafe No.: 5GEX1
RE-ISSUED Date : 04/06/2018
Re-issued: Australian Chemical Services

1. IDENTIFICATION

GHS Product Identifier

Wire Rope Lube

Company Name

Lanotec Australia Pty Ltd (ABN 87 096 795 621)

Address

Unit 79
57-101 Balham Road Archerfield
QLD 4108 Australia

Telephone/Fax Number

Tel: +61 7 3373 3700

Fax: +61 7 3373 3777

Emergency phone number

0417 638 004

Recommended use of the chemical and restrictions on use

Wire rope lubricant and corrosion protection.

Additional Information

NZ Contact: Steelmasters, 79-81 O'Rorke Road, Penrose, 1061, Auckland, New Zealand.

NZ Emergency Contact: P 09 5798196, M 021757581

2. HAZARD IDENTIFICATION

GHS classification of the substance/mixture

Not classified as Hazardous according to the Globally Harmonised System of Classification and Labelling of Chemicals (GHS) including Work, Health and Safety Regulations, Australia.

Not classified as Dangerous Goods according to the Australian Code for the Transport of Dangerous Goods by Road and Rail. (7th edition)

Precautionary statement – General

Keep out of reach of children.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Ingredients

Name	CAS	Proportion
Non hazardous component(s) to 100%		-

4. FIRST-AID MEASURES

Inhalation

If inhaled, remove from contaminated area. Apply artificial respiration if not breathing.

Ingestion

If swallowed, do NOT induce vomiting.

Skin

If skin or hair contact occurs, remove contaminated clothing and flush skin or hair with running water.

Eye contact

If in eyes wash out immediately with water.

First Aid Facilities

None specified, consider ventilation and respiratory aid.

Advice to Doctor

Treat symptomatically.

Other Information

For advice in an emergency, contact a Poisons Information Centre (Phone Australia 131 126) or a doctor at once.

5. FIRE-FIGHTING MEASURES

Fire Fighting Measures

Shut off product that may 'fuel' a fire if safe to do so. Allow trained personnel to attend a fire in progress providing fire fighters with this Safety Data Sheet. Prevent extinguishing media from escaping to drains and waterways.

Suitable Extinguishing Media

Alcohol resistant foam, or dry chemical or foam.

Hazards from Combustion Products

This product is combustible and will fuel a fire in progress.

Specific Hazards Arising From The Chemical

Hazardous decomposition: Carbon dioxide, carbon monoxide and other organic complexes upon incomplete burning or oxidation.

Other Information

Combustible liquid.

6. ACCIDENTAL RELEASE MEASURES

Emergency Procedures

This product is combustible and will fuel a fire in progress. Observe standard operating procedures for managing a blaze involving chemicals which can emit toxic vapours. There are chemical reactions that can take place through hydrolysis (reactions with water vapour) creating corrosive mixtures, and vapour hazards. Heat and flame will accelerate the oxidation process which can result in hazardous decomposition mixtures: carbon dioxide and carbon monoxide. Ensure the extinguishing media and any fire-fighting run-off is contained from contributing to environmental contamination, other chemical reaction hazards in adjacent areas, or expansion of the fire-affected area.

Clean-up Methods - Large Spillages**Major Land Spill**

- Eliminate sources of ignition.
- Warn occupants of downwind areas of possible fire and explosion hazard, where present.
- Prevent product from entering sewers, watercourses, or low-lying areas.
- Keep the public away from the area.
- Shut off the source of the spill if possible and safe to do so.
- Advise authorities if substance has entered a watercourse or sewer or has contaminated soil or vegetation.
- Take measures to minimise the effect on the ground water.
- Contain the spilled product using the resources in the spill kit.
- Recover by pumping – use explosion proof pump or hand pump – or with a suitable absorbent material.
- Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.
- See “First Aid Measures”

Major Water Spill

- Eliminate any sources of ignition.
- Warn occupants and shipping in downwind areas of possible fire and explosion hazard, where present.
- Notify the port or relevant authority and keep the public away from the area.
- Shut off the source of the spill if possible and safe to do so.

- Confine the spill if possible.
- Remove the product from the surface by skimming or with suitable absorbent material.
- Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.
- See “First Aid Measures”

7. HANDLING AND STORAGE

Precautions for Safe Handling

Store in a well-ventilated area away from incompatible materials such as strong acids and bases and strong oxidising materials. Check containers for integrity periodically and vent containers in hot weather. Employ good industrial hygiene when using this product, i.e. wash hands before and after use.

Conditions for safe storage, including any incompatibilities

This product is combustible and will fuel a fire in progress. Avoid extreme heat, direct sunlight, naked flames and ignition sources. Store any chemicals in banded or designated areas. Take precautions against static discharge.

Storage Regulations

C1 Combustible Liquid

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Occupational exposure limit values

The time weighted average concentration (TWA) for the liquid component of this product is: None specified; consider 5 g/m³, which means the highest allowable exposure concentration in an eight-hour day for a five-day working week.

The short term exposure limit (STEL) is: None specified; consider 5 g/m³, which is the maximum allowable exposure concentration at any time.

Appropriate Engineering Controls

The use of local exhaust ventilation is recommended to control process emissions near the source for this product when used as a aerosol. Laboratory samples should be handled in a fume hood. Provide mechanical ventilation of confined spaces. Use explosion proof equipment for any atomised products such as aerosols.

Respiratory Protection

If risk of inhalation of spray mist exists, wear combined organic vapour/particulate respirator. If using a respirator' ensure that the cartridges are correct for the potential air contamination and are in good working order.

Eye Protection

Consider using safety glasses or other eye protection

Personal Protective Equipment

Consider wearing long sleeves, long trousers, or coveralls, and enclosed footwear or safety boots when handling this product. It is recommended to consider wearing protective gloves when handling this product.

9. PHYSICAL AND CHEMICAL PROPERTIES

Form

Liquid

Appearance

Brown, viscous liquid

Boiling Point

> 150°C

Solubility in Water

Immiscible

pH

Not determined

Vapour Pressure

Not available

Viscosity

65-75 cSt @ 25°C

Volatile Component

ca. 5%

Density

0.85-0.87 g/ml

Flash Point

> 95°C

Auto-Ignition Temperature

> 350°C

10. STABILITY AND REACTIVITY

Chemical Stability

Stable under normal conditions of storage and handling.

Conditions to Avoid

Combustible liquid. Avoid excessive heat, sparks and naked flames.

Incompatible materials

May be incompatible with strong oxidising agents.

Hazardous Decomposition Products

Strong acids, bases and oxidisers, heat and ignition sources.

11. TOXICOLOGICAL INFORMATION

Toxicology Information

No adverse health effects expected if the product is used in accordance with this Safety Data Sheet and product label.

Oral LD50: No data; consider > 10 g/kg

Inhalation TClO: No data; consider > 10 g/kg

Ingestion

This product may cause discomfort on swallowing and result in gastric disturbances. Do not induce vomiting, but give water to drink.

Inhalation

This product is unlikely to be inhaled and produces no significant smells or vapours.

Skin

This product will have an emolient effect on the skin (moisturises) and will create a barrier to other chemicals.

Eye

This product will not be irritating to eyes, nor is there significant vapour. If the product is applied directly to the eyes, it will result in blurred vision and should be treated with first aid. There will be no permanent eye damage.

Chronic Effects

There are no chronic health effects with use of this product.

12. ECOLOGICAL INFORMATION

Persistence and degradability

Information is not available for this specific product.

Mobility

This product is unlikely to be mobile on release to the environment and does not bioaccumulate. This product contains an animal fat that is considered biodegradable.

Environmental Protection

Prevent large amounts from entering waterways, drains and sewers.

Acute Toxicity - Fish

Fish Toxicity LC50: No data; consider > 100 mg/L

Acute Toxicity - Daphnia

Daphnia Magna EC50: No data; consider > 100 mg/L

Acute Toxicity - Algae

Blue-green algae: No data; consider > 100 mg/L

Green algae: No data; consider > 100 mg/L

13. DISPOSAL CONSIDERATIONS

Disposal considerations

This product must be disposed in accordance with the local authority in chemical waste management.

Special precautions for landfill or incineration

This product is not suitable for disposal by either landfill or via municipal sewers, drains, natural streams or rivers. This product should be treated and disposed through chemical waste treatment in accordance with the local authority, or considered for use in recycling.

14. TRANSPORT INFORMATION

Transport Information

Where this material is stored, handled and used below its flashpoint it is not classified as a Dangerous Good according to the Australian Code for the Transport of Dangerous Goods by Road and Rail. However, the material is classified as a Class C1 Combustible Liquid according to AS1940.

U.N. Number

None Allocated

UN proper shipping name

None Allocated

Transport hazard class(es)

None Allocated

15. REGULATORY INFORMATION

Regulatory information

Not classified as Hazardous according to the Globally Harmonised System of classification and labelling of chemicals (GHS) including Work, Health and Safety regulations, Australia

Poisons Schedule

S5

HSNO Approval Number

Non hazardous

Australia (AICS)

All ingredients listed.

16. OTHER INFORMATION

Date of preparation or last revision of SDS

SDS reviewed: June 2018 (NZ Review)

Review date: June 2023

Supersedes: September 2017

Re-issued Feb 2019 - Address change
